PROFILE

Motivated Computer Science student with a strong command of C, C++, and Web Development. I enjoy solving logical problems using C/C++ and creating websites. I have successfully built several projects during my studies. I am now looking for an opportunity to use my skills in a professional environment and learn more.

TECHNICAL SKILLS

Programming Languages: C, C++

Web Development: HTML5, CSS3, JavaScript (Basics)

Core Concepts: Object-Oriented Programming (OOPs), Modular Programming, Data Structures

Data Management: File Handling Database Logic

Tools: Visual Studio Code, Git/GitHub, IDEs

PROJECTS

RAILWAY & TOURISM MANAGEMENT SYSTEM (C)

A console-based application designed to streamline the train booking process and provide travel information by using a modular programming approach.

- **GitHub Link:** <https://github.com/vishalbhide73-sys/C-Programing-Project>
- **Modular Architecture:** Designed separate modules for Railway Reservations and Tourism Information, ensuring clean code and easy maintenance -
- **Core Functionality:** Implemented logical functions to handle complex operations like ticket booking, cancellation, and data retrieval.
- **Data Organization:** Used structures and arrays to efficiently manage and store passenger records and destination details.

HOSPITAL MANAGEMENT SYSTEM(C++)

JUN 20XX – DEC 20XX

A robust system designed to manage hospital operations including patient records, staff, doctor schedules, lab tests, and billing using Object-Oriented Programming (OOPs).

- **GitHub Link:** <https://github.com/vishalbhide73-sys/CPP-project>
- **Role-Based Access:** Implemented separate, secure menus for **Admin, Doctors, and Staff**, ensuring that each user has access only to relevant information
- **Data Management:** Utilized **Object-Oriented Programming (OOPs)** with Classes and Objects to efficiently organize patient, doctor, and staff data
- **Persistent Data Storage:** Integrated **File Handling (fstream)** to save and retrieve records, ensuring all data remains secure and accessible even after restarting the program.
- **Integrated Modules:** Developed functional modules for **Pharmacy (with stock alerts), Ambulance assignment, Lab Report tracking, and Patient Discharge** for a streamlined hospital workflow.

EDUCATION

BACHELOR'S DEGREE
Government Holkar science collage - Indore
2024 - 2028

12TH GRADE (HIGHER SECONDRY – MP BOARD)
Government model school - Dhar
2023 - 2024

10TH GRADE (HIGH SCHOOL – MP BOARD)
Government model school - Dhar
2022 - 2023
